

# DESIGNING A MOTION GRAPHIC ON PROCEDURES TO PURIFYING FROM MENSTRUATION FOR MUSLIMS AGED 11-13 YEARS

AYU FADILA FATICHA/ 20420100008/ 20420100008@dinamika.ac.id/

## BACKGROUND

God's most perfect creation, humans have various phases in life. One of them is experiencing puberty, a phase that is a process from childhood to adulthood. A sign of puberty in women is experiencing the menstrual phase (menstruation). As a muslim woman or can be called a muslimah, it is an obligation to know and understand the laws of what must be done when experiencing menstruation because it can have an impact on worship such as obligatory prayers and fasting. To facilitate understanding in studying menstruation, researchers offer motion graphics, aiming to make material about menstruation easier to understand.

## RESEARCH GOALS

Design motion graphics as a learning medium regarding procedures for purifying menstruation for muslimah aged 11-13 years.

## DESIGN METHODS

The method used in designing the work in this research is design thinking. That has five stages such as:

## FINDINGS

Using motion graphics not only with text and images presented but also with more moving graphics can attract the audiences compared to other learning systems conventionally based only.

## SUMMARY

Motion graphics are designed infographics that can be moved like audio-visual media in the form of films, videos and animations inside the computer. Compared to conventional media, motion graphics are the best option for conveying knowledge without feeling bored and sleepy so that children of Islam can better absorb the knowledge conveyed.
